

WHAT IS CLAIMED IS:

1. A lavatory cleanser dispensing device that is height-adjustable and releases lavatory cleanser quantitatively, said lavatory cleanser dispensing device comprising:

5 a fixing member having a hanging portion at a top side thereof and a plurality of locating portions positioned at a bottom section thereof and in top-down arrangement, said hanging portion hanging on a toilet water tank; and

 a shell having at least one chamber inside, a plurality of inlets and outlets for communication between said chamber and outside, and at least one positioning portion
10 detachably mounted on said locating portions.

2. The lavatory cleanser dispensing device as defined in claim 1, wherein said shell is composed of a box-like member and a sealing member; said chamber is positioned inside said box-like member to define a plurality of first compartments and a
15 plurality of second compartments protruding further forwards from bottom sections of said first compartments, said sealing member sealing said box-like member.

3. The lavatory cleanser dispensing device as defined in claim 2, wherein said inlets are positioned at top sides of said first compartments of said box-like member;
20 said outlets are positioned at front sides of said first compartments.

4. The lavatory cleanser dispensing device as defined in claim 1, wherein said fixing member comprises a fracture; said hanging portion is integrally formed at said fracture, said hanging portion having a first bendable portion and a second bendable
25 portion, said hanging portion being smooth while not in use, said hanging portion

having a shoulder extending towards a rear side of said fixing member along said first and second bendable portions and an arm extending vertically downwards from a distal end of said shoulder.

5 5. The lavatory cleanser dispensing device as defined in claim 1, wherein said shell comprises a baffle, said baffle being recessed inwards towards said chamber therefrom and positioned over said outlets.

10 6. The lavatory cleanser dispensing device as defined in claim 1, wherein said shell further comprises a circumventive frame extending outwards from a periphery of said chamber; said positioning portions are positioned on said circumventive frame and spaced apart from each other at a predetermined distance.

15 7. The lavatory cleanser dispensing device as defined in claim 6, wherein each of said positioning portions is a hollow rectangular pillar having an opening.

20 8. The lavatory cleanser dispensing device as defined in claim 1, wherein said fixing member is rectangular; said hanging portion is positioned at a short side of said fixing member; said locating portions are positioned respectively at two long sides of a bottom section of said fixing member and spaced apart from each other at a predetermined distance.

 9. The lavatory cleanser dispensing device as defined in claim 8, wherein each of said locating portions is a column.
